PROFILE

Data professional with experience in customer and store evaluation, business intelligence, and applied AI/ML research. Uses SQL, Python, Power BI, and model evaluation to improve data reliability, clarify operational performance, and support evidence-based decisions.

EXPERIENCE

Data / AI-ML Intern
Sep 2026 – Present

Dai-ichi Life Vietnam | Ho Chi Minh City

- Assessed AI/ML models, APIs, and solution architectures for call-center workflows, balancing quality, cost, scalability, and data privacy to support technology decisions.
- Benchmarked speech-processing performance against reference data, identifying quality gaps and improvement opportunities for customer-facing information.
- Investigated transcription and downstream entity-extraction errors to help distinguish model limitations from business-rule mismatches.
- Extracted, cleaned, and validated datasets with Python to support dependable model evaluation and business analysis.

Data Analyst | Customer & Store Evaluation
Jun – Aug 2026

Mobile World Group (MWG) | Vietnam

- Analyzed customer and store evaluation data to identify service-quality patterns and opportunities to improve operations.
- Used SQL, Python, and Excel to prepare consistent datasets for KPI monitoring and management reporting.
- Built dashboards and reports that made store performance and customer feedback easier for business teams to review.

Data Analyst (Remote)
Nov 2025 – Feb 2026

Job Ready Master | Melbourne, Australia

- Analyzed and validated business data with SQL and Python, turning raw datasets into reliable reporting and actionable findings.
- Developed Power BI dashboards to communicate business performance and support stakeholder decisions.

Database Analysis Intern
Nov 2024 – Feb 2025

GESO – ERP & DMS Solutions | Ho Chi Minh City

- Extracted and checked operational datasets using SQL to support accurate business analysis and reporting.

SELECTED PROJECTS

Retail Data Warehouse & BI — Built data models and Power BI reports to understand sales, product performance, and customer patterns.

Loan Portfolio & Credit Risk — Created dashboards to monitor loan quality and portfolio risk indicators.

Housing Price Prediction — Developed a React, FastAPI, and ML application to estimate housing prices.

SKILLS

Business & BI: Customer/store analytics, KPI reporting, Power BI, Excel, Tableau

Data & Engineering: SQL, Python (Pandas, NumPy), SQL Server, Snowflake, ETL, data warehousing

AI/ML: Model and API research, architecture assessment, benchmarking, error analysis

EDUCATION & CERTIFICATIONS

BSc Computer Science (Data Science) | Swinburne University of Technology, Melbourne | 2025

Databricks: Fundamentals, Generative AI, AI Agent | HackerRank: SQL, Python, Problem Solving
